

Project proposal seminar for project managers

The seminar is divided into five significant blocks covering the drafting of the project proposal, such as developing a workable project strategy, planning the project, and its further life cycle such as controlling its implementation and evaluating the results in line with the original aims and objectives. The seminar is based on model examples and focuses on the administrative part of the proposals. The seminar is organised within the project ASFORCLIC. Registration is mandatory for participants outside the consortium on <https://asforclic.lfd.mendelu.cz/>.

25 - 27 August 2021

online

ASFORCLIC has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N°952314.
